WIFI ADAPTOR BY USB

SUPPORT TO 3G/4G MODEM AND WIFI ADAPTER ON THE USB INTERFACE

The new feature allows NX-ERA Xpress PLCs to be connected to wireless, corporate or cellular networks, wherever they are.

This feature allows, for example, the controller to use the 3G/4G network available in the region to transmit data from process units far from the command centers, without the need for a dedicated physical structure.

Communication via MQTT protocol, remote access via MasterTool software and visualization of the embedded screens on the Web Server.

3G / 4G

CYBER SECURITY

REMOTE ACCESS, CYBERSECURITY AND FILE TRANSFER PROTOCOL

Cyber security through resources available in the processor, at the application level of the Linux kernel and with resource provided by CODESYS

Firewall with configuration of user rules and availability of services (protocols) on the Ethernet port.

VPN tunnel support (P2P) for remote access to the controller and communication with other network devices.

FTP (server) for file transfer.

WEB SERVER

FLEXIBILITY IN THE DEVELOPMENT OF SMALL AND MEDIUM APPLICATIONS

System that allows the creation of supervision and monitoring screens without the use of a SCADA software.

Embedded in the controller's memory, it's possible to access the screens through a Web browser directly from the computer, tablet or smartphone

Control and supervision application on a single programming software

Considerable cost reduction in the project

APPROVALS

UL AND cUL CERTIFICATION

The NX-ERA Xpress CPUs are listed as in compliance with Underwriters Laboratories safety standards, a mandatory certification in markets such as the United States and Canada.

DNV-GL CERTIFICATION (MARINE CERTIFICATION)

The high quality of NX-ERA Xpress CPUs are attested by renowned world-class technology institutes such as DNV-GL –Type Approval category.

In the conformal coating process a thin layer of nonconductive material is applied to protect against corrosion, extreme temperatures, sea air, humidity, among others.

CE Certification for Nx-Era Xpress PLC

The CE marking on the Nx-Era Xpress PLC signifies that the product complies with the essential requirements of all applicable European Union directives. This certification ensures that the Nx-Era Xpress PLC meets the necessary health, safety, and environmental protection standards, reflecting our commitment to delivering reliable, high-quality industrial automation solutions that conform to international standards.
